Inclledon

The most trusted name in quality products & brands

www.inclledon.co.za

CHARACTERISTICS

USES - Self-priming centrifugal pump for water supplies (even if mixed with gas) in small household systems, connected to autoclave tanks, for transferring liquids and emptying tanks; also used for gardening.

CONSTRUCTION FEATURES - Cast iron pump casing with threaded inlet and outlet; cast iron motor bracket or in aluminium; impeller in Noryl® or in brass; ceramic - graphite mechanical seal; motor shaft in AISI 416 steel; world leading brand ball bearings; liquid temperature range 0 - 50 °C; max. operating pressure 6 bar.

MOTOR - 2 pole electric induction motor for continuous operations; stator made with low-loss laminated electric sheet steel; insulation Class F; IP 44 protection level; thermal protection for single-phase models; the user is responsible for supplying protection for the three-phase models.

ON REQUEST - Other operating voltages and frequencies; special mechanical seal; special liquids.

CHARACTERISTICS

USES - Self-priming centrifugal pump for water supplies (even if mixed with gas) in small household systems, connected to autoclave tanks for transferring liquids and emptying tanks; used in medium sized industrial applications and for gardening.

CONSTRUCTION FEATURES - AISI 303 stainless steel pump casing with threaded inlet and outlet; aluminium motor bracket and AISI 303 stainless steel mechanical seal holder; Noryl[®] impeller for INOXR; AISI 304 stainless-steel or Noryl[®] for all other models; ceramic - graphite mechanical seal; motor shaft in AISI 416 steel; world leading brand ball bearings; liquid temperature range 0 - 50 °C; max. operating pressure 6 bar.

MOTOR - 2 pole electric induction motor for continuous operations; stator made with low-loss laminated electric sheet steel Insulation Class F; IP 44 protection level; thermal protection for single-phase models; the user is responsible for supplying protection for the three-phase models.

ON REQUEST - Other operating voltages and frequencies; special mechanical seal; special liquids.

CHARACTERISTICS

USES - Self-priming centrifugal pump for water supplies (even if mixed with gas) in small and medium household and civil systems; when connected to autoclave tanks, an automatic pressurisation system comes.

CONSTRUCTION FEATURES - Cast iron pump casing with threaded inlet and outlet; cast iron motor bracket; impeller in Noryl® or in brass; ceramic - graphite mechanical seal; motor shaft in AISI 303 steel on the hydraulic side; world leading brand ball bearings; liquid temperature range 0 - 50 °C; max. operating pressure 6 bar.

CHARACTERISTICS

USES - Peripheral pumps with frontal pumps for small household systems and simple industrial applications; characterised by a considerable ratio between performance and required output.

CONSTRUCTION FEATURES - Cast iron pump casing (mod. PM) with threaded intake and delivery openings ; pump casing available in bronze (mod. PM45-Br) ; cast iron motor bracket or bronze on request (mod. PM45-Br); radial blade brass impeller; ceramic - graphite mechanical seal; motor shaft in AISI 416 steel ; world leading brand ball bearings; liquid temperature range 0 - 90 °C; max. operating pressure 6 bar (8 bar for PM80).

MOTOR - 2 pole electric induction motor for continuous operations; stator made with low-loss laminated electric sheet steel; insulation Class F; IP 44 protection level; thermal protection for single-phase models; the user is responsible for supplying protection for the three-phase models.

ON REQUEST - Other operating voltages and frequencies; special mechanical seal; special liquids.

CHARACTERISTICS

USES - Peripheral pumps with side suction pumps for small household systems and simple industrial applications; characterised by a considerable ratio between performance and required output. The CP model has a frontal brass inset avoiding the risk of blockage.

CONSTRUCTION FEATURES - Cast iron and brass pump casing with threaded intake and delivery openings; radial blade brass impeller; ceramic - graphite mechanical seal; motor shaft in AISI 416 steel ; world leading brand ball bearings; liquid temperature range 0 - 90 °C; max. operating pressure 6 bar (8 bar for CP75).

MOTOR - 2 pole electric induction motor for continuous operations; stator made with low-loss laminated electric sheet steel; insulation Class F; IP 44 protection level; thermal protection for single-phase models; the user is responsible for supplying protection for the three-phase models.

ON REQUEST - Other operating voltages and frequencies; special mechanical seal; special liquids.

CHARACTERISTICS

USES - Liquid ring pump with star impeller that gives considerable suction power to the pump. Particularly suitable for liquid transfer (including volatile liquids). The MD model has a frontal brass inset avoiding the risk of blockage.

CONSTRUCTION FEATURES - Cast iron and brass pump casing with threaded openings (side intake); cast iron motor bracket; brass star impeller; ceramic - graphite mechanical seal; motor shaft in AISI 416 steel; world leading brand ball bearings; liquid temperature range 0 - 90 °C; max. operating pressure 8 bar.

MOTOR - 2 pole electric induction motor for continuous operations; stator made with low-loss laminated electric sheet steel; insulation Class F; IP 44 protection level; thermal protection for single-phase models; the user is responsible for supplying protection for the three-phase models.

ON REQUEST - Other operating voltages and frequencies; special mechanical seal; special liquids.

MD 100	70	98.5	270	135	112	141	170	1"G	1"G	310	185	195	11.6

CHARACTERISTICS

USES - Single impeller centrifugal pumps, extremely silent suitable for household, civil and industrial applications, with a very flat curve to guarantee constant pressure even when the delivery volumes vary.

CONSTRUCTION FEATURES - Cast iron pump casing with threaded openings; cast iron motor bracket and aluminium on models CM75 and CM100.; impeller in Noryl® or in brass (models CM50, CM75 and CM100). Brass rotor on models CM 160-314; ceramic - graphite mechanical seal; motor shaft in AISI 416 steel for CM 50-75-100, in AISI 303 the hydraulic side in other models; world leading brand ball bearings; liquid temperature range 0 - 90 °C (0 - 50 °C if impeller in Noryl® or aluminium support) ; max. operating pressure 6 bar for models CM50, CM75, CM100, 8 bar for larger models).

MOTOR - 2 pole electric induction motor for continuous operations; stator made with low-loss laminated electric sheet steel; insulation Class F; IP 44 protection level; thermal protection for single-phase models; the user is responsible for supplying protection for the three-phase models.

ON REQUEST - Other operating voltages and frequencies; special mechanical seal; special liquids.

CHARACTERISTICS

USES - Monobloc horizontal centrifugal pumps, constructed to EN 733 standards; widely used in water supplies, pressurisation and fire-fighting systems, standard supply with screwed mating flange.

CONSTRUCTION FEATURES - Cast iron pump casing with standardised flanged openings; cast iron motor bracket; impeller in cast iron, on request in bronze; ceramic - graphite mechanical seal; motor shaft in AISI 304 steel on the hydraulic side; world leading brand ball bearings; liquid temperature range 0 - 90 °C; max. operating pressure 10 bar.

MOTOR - 2 pole electric induction motor for continuous operations; stator made with low-loss laminated electric sheet steel; insulation Class F; IP 55 protection level; the user is responsible for supplying thermal protection on all models.

ON REQUEST - Other operating voltages and frequencies; special mechanical seal; special liquids.

CHARACTERISTICS

USES - Medium delivery centrifugal pumps for small and medium agricultural applications. Open rotor which allows small solid items to pass through (Ø max 10 mm.).

CONSTRUCTION FEATURES -Cast iron pump casing with threaded openings; cast iron motor bracket; impeller in Noryl® or in brass; ceramic - graphite mechanical seal; motor shaft in AISI 416 steel; world leading brand ball bearings; liquid temperature range 0 - 90 °C (0 - 50 °C if impeller in Noryl®); max. operating pressure 6 bar.

MOTOR - 2 pole electric induction motor for continuous operations; stator made with low-loss laminated electric sheet steel; insulation Class F; IP 44 protection level; thermal protection for single-phase models; the user is responsible for supplying protection for the three-phase models.

ON REQUEST - Other operating voltages and frequencies; special mechanical seal; special liquids.

CHARACTERISTICS

USES - Centrifugal pumps that combine medium head with medium-high delivery; ideal for irrigation and in applications where quiet operations are requested and only slight pressure change as the delivery. Volume vary.

CONSTRUCTION FEATURES - Cast iron pump casing with threaded openings; cast iron motor bracket; Impeller in brass for models CH150, CH200 CH300; in cast iron for models CH 350+550; ceramic - graphite mechanical seal; motor shaft in AISI 303 steel on the hydraulic side; world leading brand ball bearings; liquid temperature range 0 - 90 °C; max. operating pressure 6 bar.

MOTOR - 2 pole electric induction motor for continuous operations; stator made with low-loss laminated electric sheet steel; insulation Class F; IP 44 protection level; the user is responsible for supplying protection.

ON REQUEST - Other operating voltages and frequencies; special mechanical seal; special liquids.

CHARACTERISTICS

USES - Single impeller centrifugal pumps, medium sliding high delivery with 2", 3" and 4" delivery openings; mainly used in agriculture and applications requiring high capacities delivery.

CONSTRUCTION FEATURES -Cast iron pump casing with threaded openings; cast iron motor bracket; cast iron impeller, and brass impeller for models CSB100 and CSB150 ; ceramic - graphite mechanical seal; motor shaft in AISI 416 steel (CS 75-100), in AISI 303 the hydraulic side in other models; world leading brand ball bearings; liquid temperature range 0 - 90 °C; max. operating pressure 6 bar.

MOTOR - 2 pole electric induction motor for continuous operations; stator made with low-loss laminated electric sheet steel; insulation Class F; IP 44 protection level; thermal protection for single-phase models (excluding models CS200, CS300 and CS450); the user is responsible for supplying protection for the three-phase models.

ON REQUEST - Other operating voltages and frequencies; special mechanical seal; special liquids.

CHARACTERISTICS

USES - Two impeller centrifugal pumps for constructing pressurisation systems for civil and industrial plant; the two counter-posed impellers guarantee high head with good delivery.

CONSTRUCTION FEATURES - Cast iron pump casing with threaded openings; cast iron motor bracket; impeller in brass and Noryl® (mod. CB100 + 751, CBT 900), brass impeller CBT 800, 1000 + 1500; ceramic - graphite mechanical seal; motor shaft in AISI 416 steel CB 100, in 303 the hydraulic side in other models; world leading brand ball bearings; Liquid temperature range 0 - 90 °C (0 - 50 °C if impeller in Noryl®); max. operating pressure: 6 bar for CB100, 10 bar up to CBT 751 and CBT 900, 11 bar for larger models.

MOTOR - 2 pole electric induction motor for continuous operations; stator made with low-loss laminated electric sheet steel; insulation Class F; IP 44 protection level; thermal protection for single-phase models (excluding models CB400 and CB600); the user is responsible for supplying protection for the three-phase models.

ON REQUEST - Other operating voltages and frequencies; special mechanical seal; special liquids.

CHARACTERISTICS

USES - Two impellers compact centrifugal pumps for constructing pressurisation systems irrigation systems, for civil and industrial plant: guarantee good ratio between pressure and delivery.

CONSTRUCTION FEATURES - Cast iron pump casing with threaded openings; cast iron motor bracket; impeller in Noryl® or in brass; ceramic - graphite mechanical seal; motor shaft in AISI 303 steel on the hydraulic side; world leading brand ball bearings; liquid temperature range 0 - 90°C (0 - 50°C if impeller in Noryl®); max. operating pressure 8 bar.

MOTOR - 2 pole electric induction motor for continuous operations; stator made with low-loss laminated electric sheet steel; insulation Class F; IP 44 protection level; thermal protection for single-phase models; the user is responsible for supplying protection for the three-phase models.

ON REQUEST - Other operating voltages and frequencies; special mechanical seal; special liquids.

CHARACTERISTICS

USES - Stainless steel multistage horizontal pumps. Pumping of clean non-loaded fluids in the domestic, agricultural and industrial sectors; pressurizing systems; irrigation; drinking and glycol water; water treatment; food industry; heating and air conditioning; washing system.

ADVANTAGES - Closed coupled and compact; silent; excellent efficiency that allows a reduction of running cost and power consumption; economical; over-dimensioned bearing for longer life of the machines: intermediate shaft guiding stage for concentricity of rotation

CONSTRUCTION FEATURES - Capacity: up to 26 m³/h; total Head: up to 78 m.; maximum working pressure: 8 bar (9 bar with 7 impellers); maximum liquid temperature: from -15 up to + 110 °C; ambient temperature: max 40 °C.

MOTOR - 2 pole induction Motor; single phase 230V - 50Hz with thermal protector up to P2= 1,85 Kw; three phase 230-400V - 50 Hz; insulation class F; protection degree IP 44.

MATERIALS - Pump body, impellers, diffusers, mechanical seal disc holder: chromo-nickel steel AISI 304; pump shaft: AISI 304 chromo-nickel steel; motor bracket: aluminum alloy; mechanical seal: ceramic-graphite up to 6 stages - graphite-silicon carbide from 7 stages; intermediate shaft guiding stage bush: ceramic-tungsten carbide; pump body gasket: EPDM.

CHARACTERISTICS

USES - Drainage pump with set-back Vortex type impeller for pumping charged waters and liquids with suspended solids; ideal for civil and household applications.

CONSTRUCTION FEATURES - Steel case and stainless steel suction grid; pump casing in stainless steel with openings measuring 1"1/2 and 2"; stainless steel set-back Vortex type impeller; double seal with oil barrier; silicon carbide on pump side, sealing ring on motor side; motor shaft in AISI 416 steel; world leading brand ball bearings; liquid temperature range 0 - 40 °C; supplied with 10 meters of H07 RNF cable. Available with or without float.

MOTOR - 2 pole electric induction motor in oil bath suitable for continuous operations; stator made with low-loss laminated electric sheet steel; insulation Class F; IP 68 protection; condenser inside. Thermal protection for single-phase models; the user is responsible for supplying protection for the three-phase models.

ON REQUEST - Other operating voltages and frequencies; special liquids.

CHARACTERISTICS

USES - impeller rotor for pumping liquids with suspended solids. Characterised by head in ratio to the type and size of the machine.

CONSTRUCTION FEATURES - Steel case and stainless steel suction grid; pump casing in stainless steel with openings measuring 1"1/2 and 2"; brass impeller; double seal with oil barrier; silicon carbide on pump side, sealing ring on motor side; motor shaft in AISI 416 steel; world leading brand ball bearings; liquid temperature range 0 - 40°C; supplied with 10 meters of H07 RNF cable. CHARACTERISTICS

USES - Single-channel centrifugal drainage pump: besides the high capacity it guarantees excellent head; ideal for civil and industrial applications; specifically designed for very heavy use; available in the mobile or permanent versions with duck foot arrangement.

CONSTRUCTION FEATURES - Cast iron pump casing with flanged delivery opening; impeller in cast iron; double mechanical silicon carbide gasket with oil barrier on pump side, ceramic graphite on motor side; motor shaft in AISI 304 steel on the hydraulic side; liquid temperature range 0 - 40 °C; supplied with 10 meters of H07 RNF cable; for single-phase models a control board must be used complete with starter capacitor (35 F for the version 1,5 HP, 50F for the version 2 HP).

MOTOR - 4 pole electric induction motor in oil bath suitable for continuous operations; stator made with low-loss laminated electric sheet steel; insulation Class F; IP 68 protection; the user is responsible for motor protection.

ON REQUEST - Other operating voltages and frequencies; special liquids.

(*) Starting capacitor for single phase pumps must be provided by user through an external control box (35kF for 1,5 HP pumps; 50kF for 2 HP pumps) monofase

COMPONENTS	MATERIALS
Motor housing, hydraulic part:	grey cast iron
Electric motor:	asynchronous type, oil immersed
Shaft (pump side):	stainless steel
Motor side mechanical seal:	carbon - ceramic
Pump side mechanical seal:	silicon carbide - silicon carbide
Bolts:	A2 stainless steel
Foot support:	galvanized iron
Gaskets (O-Rings):	NBR rubber

CHARACTERISTICS

USES - Single-channel centrifugal drainage pump: besides the high capacity it guarantees excellent head; ideal for civil and industrial applications; specifically designed for very heavy use; available in the mobile or permanent versions with duck foot arrangement.

CONSTRUCTION FEATURES - Cast iron pump casing with flanged delivery opening; impeller in cast iron; double mechanical silicon carbide gasket with oil barrier on pump side, ceramic graphite on motor side; motor shaft in AISI 304 steel on the hydraulic side; liquid temperature range 0 - 40 °C; supplied with 10 meters of H07 RNF cable; for single-phase models a control board must be used complete with starter capacitor (35F for the version 1,5 HP, 50F for the version 2 HP).

MOTOR - 4 pole electric induction motor in oil bath suitable for continuous operations; stator made with low-loss laminated electric sheet steel; insulation Class F; IP 68 protection; the user is responsible for motor protection.

ON REQUEST - Other operating voltages and frequencies; special liquids.

CHARACTERISTICS

Automatic working pressure systems build-up with centrifugal or self-priming electropumps. Each set, ready for the installation, is made by an electropump, a pre-rated and adjustable pressure switch, pressure gauge, connector (and eventually a flexible hose with s.s sheath), membrane tank or protective starting device with built-in check valve and no-flow switch. The set specification and performances are related to the adapted electropump tank capacity and pressure switch rating.

TANKS

UTILIZATION - Interchangeable membrane expansion tanks; the pre-charge pressure in the tank guarantees a water reserve but also reduces the number of startups of the connected pump; the membranes are certified for use with foodstuffs; they may be in EPDM or butyl depending on the model.

CONSTRUCTION CHARACTERISTICS - Flanges in galvanised steel or AISI 304 stainless steel; tanks in carbon steel coated with powder paint or in AISI 304 stainless steel; pre-charge valve with protective cover.
